Hubshare

Hubshare: Agile & Simple
Collaboration Working

About Hubshare

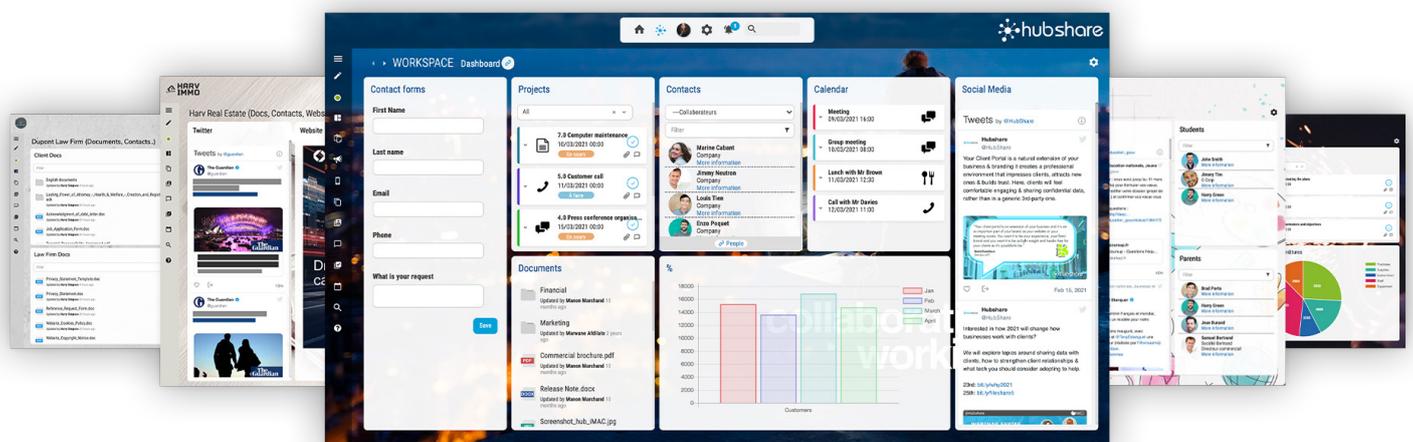

Hubshare is a document management and collaborative workspace solution that allows customers to create fully customizable collaboration hubs. We provide customers and their clients with innovative features to streamline daily work, optimize your time and your business processes, in a 100% customizable and secure environment.

What is a Hub?

A hub is a secure, modular & customizable workspace. Invite people from inside and outside your company and create as many hubs as you want. Hubs enable you to:

- Manage team projects
- Share documents with others
- Communicate with customers
- Organise your internal and external events

Features can be enabled or disabled in your hubs, depending on your needs and requirements.

An All-In-One-Solution

Several use cases in a single digital platform.

INTRANET

Enhance your internal collaboration by quickly communicating with different departments and teams in your company related to projects, documents, and other initiatives. Easily create group discussions for

DIGITAL WORKPLACE

Working methods have changed dramatically in recent years. Companies need new tools to assist with digital transformation.

Secure Platform

Collaborative Working

Social Workplace

Document Management

EXTRANET

Share sensitive data with your external users and manage individual permissions to limit access and secure documents. Streamline remote work by staying connected from any device at any time. Collaborate on projects or documents to improve efficiency and processes.

more seamless collaboration. Showcase the company culture by displaying content from web pages, social networks, news feeds and more directly in Hubshare.

Hubshare helps businesses by transforming the employee work experience and enabling new heights of efficiency and collaborative innovation.

The digital workplace is much more than collaborative hubs, social intranets, or a random collection of collaborative tools. It's a complete solution that immerses you in an all-in-one work environment that enables more efficient, simpler and more collaborative work.

Our Modules

The following 8 modules provide innovative and easy-to-use features that make daily work life easier.

Easily choose to enable or disable each module in a hub and manage the access rights of individual users. Securing your entire workspace and promoting internal and external collaboration has never been simpler.

Configuration & Style: Create and customize the look and feel of hubs to match your brand or your client's brand

Dashboard: Centralize all of the data and information in your hub in a single interface.

Documents: Manage, edit, and share documents easily and efficiently with internal and external contacts.

Contacts: Create a contact list by easily listing their details.

Blog: Communicate with users individually, in a group, in private discussions or a news feed.

Project: Organize your projects for optimal efficiency by offering your team an intuitive collaborative tool (Kanban, Timeline, To do list...).

Calendar: Plan events with users and manage your schedule.

Advanced Search: Quickly find relevant content with powerful, intuitive search.

M-Files/Hubshare Connector

PRESENTATION

The M-Files connector allows you to create a hub and seamlessly share documents stored in M-Files with your clients via Hubshare. Simply invite clients to access your hub and define the documents that they can view. Access rights allow you to choose whether documents are view only or downloadable and you can even allow users to upload new documents. That way, documents in M-Files can be managed without ever needing to leave Hubshare.

Connect M-Files and Hubshare solutions for an enhanced collaboration experience.

FEATURES

Secure access to your client documents

Two factor authentication and single sign on

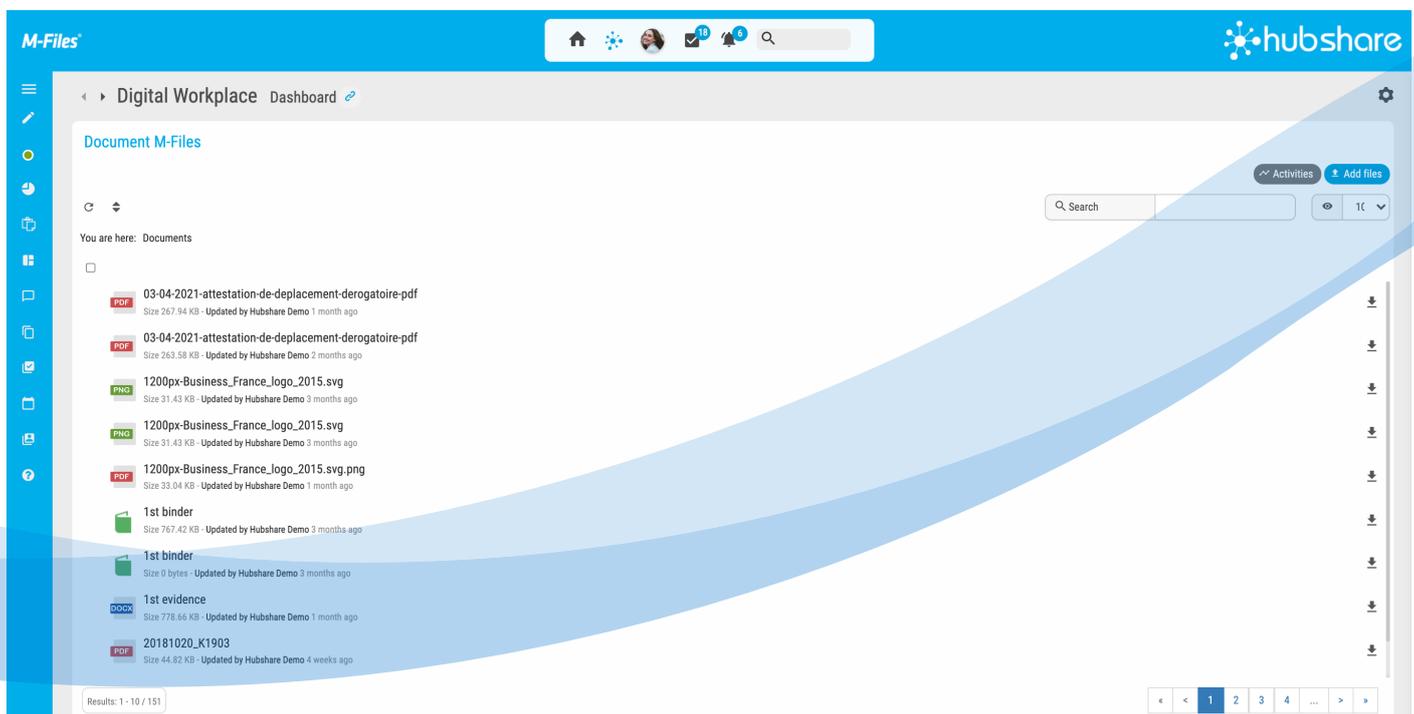

Control which documents are displayed directly from within M-Files

Filter linked M-Files documents with grouping options

Brand each client portal to make them personalized

Document access rights can be set to download, upload or view only modes

Powerful search and filter to find the documents you need

We have customers from across the globe in many industries

Hubshare demonstrated superior adaptability and seamless integration to our current workflows while maintaining ease of use for both internal and external users.

Patti Macdonald

Managing Partner
Bishop & McKenzie, Canada

Hubshare has really changed our daily lives because we needed to improve the quality of our communication, both between the account manager and the site manager and between the client and us.

Mickael Amatulli

Business Manager
Fugybat, France

Since we have been using Hubshare, our top-down and cross-functional communication has been transformed.

Anne-Cécile Healy

Marketing Communication Manager

About M-Files

M-Files provides a next-generation intelligent information management platform that improves business performance by helping people find and use information more effectively. Unlike traditional enterprise content management (ECM) systems or content services platforms, M-Files unifies systems, data and content across the organization without disturbing existing systems and processes or requiring data migration. Using artificial intelligence (AI) technologies in its unique Intelligent Metadata Layer, M-Files breaks down silos by delivering an in-context experience for accessing and leveraging information that resides in any system and repository, including network folders, SharePoint, file sharing services, ECM systems, CRM, ERP and other business systems and repositories. Thousands of organizations in more than 100 countries use M-Files for managing their business information and processes, including NBC Universal, OMV, Rovio, SAS Institute and thyssenkrupp.
