

Document Automation: Scaling New Heights in Legal Efficiency

HOW VISUAL AUTOMATION CAN BOOST SCALABILITY

It's simply the **new reality**: To scale your law firm or in-house legal team to the peak of efficiency and profitability requires digital transformation. While there are dozens of paths to this peak, the most direct, the simplest, and the most effective is the path of visual document automation.

Let's break down this journey:

CHALLENGES

Avalanche of errors
Copying old clauses and double keying data increases the risk of costly errors.

Lower attorney productivity
When attorneys are forced to slog through manual tasks, the bottom line suffers.

Time wasters
Wasting time creating regularly requested contracts from non-automated Word templates.

Peak demand
In-house counsel become a bottleneck without easy access to their clause and playbook variations.

GUIDEPOSTS TO SCALABILITY

VISUAL DOCUMENT AUTOMATION
A fully visual document automation tool helps seamlessly generate complex, data-driven documents quickly and consistently.

MAXIMIZE NEXT-LEVEL ROI
Document automation drives scalability by minimizing manual work processes and maximizing new revenue streams and cost savings.

DELIVER CLIENT SELF SERVICE
Release automated content anywhere and generate documents directly from third-party input.

A WORTHY CLAUSE
A clause library allows storage of commonly used text. Simply drop clause into generated documents.

100% NO-CODE
A no-code automation interface tool empowers lawyers to automate and maintain their own automated templates.

BOOST EFFICIENCY & PROFITABILITY
Do more with the same resources: Minimize repetitive tasks.

ROBUST COMPLIANCE
Documents generated automatically stay compliant within company best practices and based on the latest versions.

RAPID TIME TO VALUE
Template authors can learn how to automate in as little as 15 minutes: Automate documents rapidly without expensive technical resources.

WELCOME TO THE DIGITAL TRANSFORMATION!

With its 100% visual, no-code interface, M-Files Ment is one of **most scalable and easy-to-implement** document automation tools on the market.

Document automation is a powerful way to scale your work and bottom line by minimizing manual work processes. Generate new revenue streams and cost savings.

Do more with the same resources by minimizing repetitive tasks and optimizing task processes. Use the time and money saved for more complex tasks.

Documents generated with M-Files Ment stay compliant within company best practices and based on the latest versions.

M-Files Ment features a clause library which allows storage of commonly used text, which can easily be dropped into generated documents making drafting quicker and easier.
